

How to Use the Instant Quote Calculator

1. Countertop Size:
 - Adjust the Slider to select the total square footage (SQ FT) of the countertop. For example, if your countertop is 85 square feet, slide to 85 SQ FT.
2. Backsplash:
 - Use the Backsplash Slider to choose the total length of backsplash in linear feet (LN FT). If you don't want a backsplash, leave it at 0.
3. Wall Application:
 - Set the Wall Application by sliding to the required square footage for any additional wall cladding. Set it to 0 if not needed.
4. Sinks:
 - Choose the Number of Sinks to install using the slider. This can range from 0 to the number of sinks you are planning to integrate.
5. Edge & Feature Options:
 - Mitered Edge: Turn on if you want a mitered edge for your countertop.
 - Raised Bar: Toggle this option if you want to include a raised bar area.
 - Overhang Supports: Enable this if your design requires overhang supports.
 - Cooktop: Select if your countertop will include a cutout for a cooktop.
 - Waterfall: Toggle on if you want a waterfall edge for the countertop.
 - TopZero Integration: Enable this option if you're integrating TopZero sinks.
 - Invisacook Integration: Turn on if you are planning to include an Invisacook system.
6. Material Selection:
 - Select Your Material from the dropdown. For instance, you can select "Dekton" for a specific price estimate based on that material.
7. Price Estimate:
 - View the Medium Price (most accurate estimate) for your setup in the box labeled "Total Price." It includes materials and the features you've selected.
 - Below the medium price, you'll see a Low Price (minimum cost) and a High Price (maximum cost).
8. Instant Quote:
 - Once everything is set, click on the Instant Quote button to proceed with the quote, which will reflect your chosen options and details.

This calculator is designed to give a fast and comprehensive estimate of your project cost based on various features and customization options.
